- CineMotion® Reverse 3:2 Pulldown
- 3D Y/C comb filter
- Picture Freeze
- 2 Watts x 2
- Compact Bottom Speaker Design
- Input Skip Function
- Video Label

Key Technologies

1-Chip Video Processor S-Series LCD televisions use a full-digital, 1-chip video processor for crisp and clear images. Several unique picture enhancement technologies are integrated into the processor to create better gradations and details, enhance contrast, dynamically improve color, and reduce image flicker.

Freeze Function Sony's Freeze Function is a useful function that allows you to freeze one screen while the other screen continues showing the program. This comes in handy when you want to copy a recipe, phone number, etc. that flashes too quickly across your screen. Simply touch the "Freeze" button on the remote control and copy the details down at your convenience.

Quiet, Fanless Performance Sony's G-Series LCD WEGA televisions were designed for efficient heat dispersal without the need for a cooling fan so you can enjoy a quieter, more enjoyable viewing experience.

SRS® WOW and Steady Sound® Technology SRS WOW widens the soundstage by processing standard two-channel stereo material as well as multi-channel encoded material for a dramatic improvement in the playback of any stereo audio over a two-speaker system. And Sony's Steady Sound® feature automatically prevents unwanted blasts of sound that can occur during commercial breaks while improving the overall sound clarity.

VESA Compliant VESA mount compatible means flexibility when it comes to mounting your LCD TV on the wall. The G-Series LCD televisions allow the use of a 100 x 100 mm, M4 VESA compliant wall mount bracket.
